Note: Please do not feel you need to respond to all these questions. They are provided in order for you to provide a complete description of your specific needs and the following items may or may not reflect all your needs, therefore, feel free to digress and add items. As this is a word.doc you should be able to cut and paste those sections that apply to an email if you wish.

3 Galleries 11 to 20 images ___

Members Area (The Member Area is often used in conjunction with a CMS = Content Management Site Option)
(CMS is a special option that allows you the website owner to log in and edit the content of a page directly as often as you wish without having to request any additional changes through our service. Members Area is pretty much what it sounds like. There is a restricted area on your website that is open to Members Only which requires a Separate Log In and Password for each Member after which they have access to that section on your site.)
Note: This requires setting up a database. We normally use a SQL 5 database and depending upon your hosting package may or may not require any additional fees.

No thanks ___

Note: The more collateral you can provide the better. However, we have over 20 years experience in graphics and web authoring business so there is no pressure for you to provide anything other than your original concept. We will be happy to provide those additional services at more than reasonable pricing.

Additional Notes:

Please feel free to include your own version of this document or a simple summary.
